Jonathan Hemingway

NCL Spring 2026 Team Game Scouting Report

Dear Jonathan Hemingway (Team "SANS.edu Sentinels 402 - Payment Required"),

Thank you for participating in the National Cyber League (NCL) Spring 2026 Season! Our goal is to prepare the next generation of cybersecurity professionals, and your participation is helping achieve that goal.

The NCL was founded in May 2011 to provide an ongoing virtual training ground for collegiate students to develop, practice, and validate their cybersecurity skills in preparation for further learning, industry certifications, and career readiness. The NCL scenario-based challenges were designed around performance-based exam objectives of CompTIA certifications and are aligned to the National Initiative for Cybersecurity Education (NICE) Cybersecurity Workforce Framework published by the National Institute of Standards and Technology (NIST).

As you look to a future career in cybersecurity, we hope you find this report to be valuable in both validating skills and identifying areas for improvement across the nine NCL skills categories. You can use this NCL Scouting Report to:

- Validate your skills to employers in any job application or professional portfolio;
- Show case your achievements and strengths by including the Score Card view of your performance as part of your résumé or simply sharing the validation link so that others may view the detailed version of this report.

The NCL Spring 2026 Season had 7,520 students/players and 583 faculty/coaches from more than 440 two- and four-year schools & 220 high schools across all 50 U.S. states registered to play. The Individual Game Capture the Flag (CTF) event took place from April 10 through April 12. The Team Game CTF event took place from April 24 through April 26. The games were conducted in real-time for students across the country. You were in the Experienced Students Bracket, consisting of students enrolled in advanced degrees or hold extensive industry working experience.

NCL is powered by Cyber Skyline's cloud-based skills evaluation platform. Cyber Skyline hosted the scenario-driven cybersecurity challenges for players to compete and track their progress in real-time.

To validate this report, please access: cyberskyline.com/report/00HR67MB43CJ

Congratulations for your participation in the NCL Spring 2026 Team Game! We hope you will continue to develop your knowledge and skills and make meaningful contributions as part of the Information Security workforce!

Dr. David Zeichick
NCL Commissioner

NCL Spring 2026 Team Game

The NCL Team Game is designed for student players nationwide to compete in realtime in the categories listed below. The Team Game promotes camaraderie and evaluates the collective technical cybersecurity skills of the team members.

3RD PLACE OUT OF 341 EXPERIENCED STUDENTS RANK	3000 POINTS OUT OF 3000 PERFORMANCE SCORE	99.5% ACCURACY	100.0% COMPLETION
100th Experienced Students Percentile	Average: 1942.6 Points	Average: 71.7%	Average: 68.8%
Cryptography	360 POINTS OUT OF 360	100.0% ACCURACY	COMPLETION: 100.0%
Identify techniques used to encrypt or obfuscate messages and leverage tools to extract the plaintext.			
Enumeration & Exploitation	300 POINTS OUT OF 300	93.8% ACCURACY	COMPLETION: 100.0%
Identify actionable exploits and vulnerabilities and use them to bypass the security measures in code and compiled binaries.			
Forensics	300 POINTS OUT OF 300	100.0% ACCURACY	COMPLETION: 100.0%
Utilize the proper tools and techniques to analyze, process, recover, and/or investigate digital evidence in a computer-related incident.			
Log Analysis	300 POINTS OUT OF 300	100.0% ACCURACY	COMPLETION: 100.0%
Utilize the proper tools and techniques to establish a baseline for normal operation and identify malicious activities using log files from various services.			
Network Traffic Analysis	300 POINTS OUT OF 300	100.0% ACCURACY	COMPLETION: 100.0%
Identify malicious and benign network traffic to demonstrate an understanding of potential security breaches.			
Open Source Intelligence	385 POINTS OUT OF 385	100.0% ACCURACY	COMPLETION: 100.0%
Utilize publicly available information such as search engines, public repositories, social media, and more to gain in-depth knowledge on a topic or target.			
Password Cracking	355 POINTS OUT OF 355	100.0% ACCURACY	COMPLETION: 100.0%
Identify types of password hashes and apply various techniques to efficiently determine plaintext passwords.			
Scanning & Reconnaissance	300 POINTS OUT OF 300	100.0% ACCURACY	COMPLETION: 100.0%
Identify and use the proper tools to gain intelligence about a target including its services and potential vulnerabilities.			
Web Application Exploitation	300 POINTS OUT OF 300	100.0% ACCURACY	COMPLETION: 100.0%
Identify actionable exploits and vulnerabilities and use them to bypass the security measures in online services.			

Note: Survey module (100 points) was excluded from this report.

Cryptography Module

Identify techniques used to encrypt or obfuscate messages and leverage tools to extract the plaintext.

5TH PLACE

EXPERIENCED STUDENTS RANK

360 POINTS
OUT OF 360
PERFORMANCE SCORE

Average: 72.3%

Average: 72.6%

99th Experienced Students
Percentile

Average: 230.1 Points

Paper Chase (Easy)

30 POINTS
OUT OF 30

100.0%
ACCURACY

COMPLETION: **100.0%**

Manually extract a flag from an image of a punch card.

Hex password (Easy)

60 POINTS
OUT OF 60

100.0%
ACCURACY

COMPLETION: **100.0%**

Recover a password that has been XOR-encrypted and encoded in UTF-16.

Decoding (Easy)

60 POINTS
OUT OF 60

100.0%
ACCURACY

COMPLETION: **100.0%**

Identify and decrypt different cipher schemes.

Unc's Encryption (Medium)

100 POINTS
OUT OF 100

100.0%
ACCURACY

COMPLETION: **100.0%**

Exploit poor implementation of ECDSA signatures through r value reuse.

Collisions (Medium)

50 POINTS
OUT OF 50

100.0%
ACCURACY

COMPLETION: **100.0%**

Forge a message that produces a truncated SHA1 hash collision.

Checkpoint (Hard)

60 POINTS
OUT OF 60

100.0%
ACCURACY

COMPLETION: **100.0%**

Flip bits in AES-CBC ciphertext to forge a trusted session token.

Enumeration & Exploitation Module

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in code and compiled binaries.

COMPLETION: **100.0%**

Introductory challenge on acceptable conduct during NCL.

MEROPS (Easy)

50 POINTS
OUT OF 50

100.0%
ACCURACY

COMPLETION: **100.0%**

Identify key search terms and execute search for information.

ATT&CKED (Easy)

75 POINTS
OUT OF 75

100.0%
ACCURACY

COMPLETION: **100.0%**

Research and distill threat reporting to map adversary Tactics, Techniques, and Procedures (TTPs) to the MITRE ATT&CK framework.

Boarding Pass (Medium)

90 POINTS
OUT OF 90

100.0%
ACCURACY

COMPLETION: **100.0%**

Decode a boarding pass barcode and use historical ADS-B data to discover information about a flight.

This Way Pleaaee! (Medium)

50 POINTS
OUT OF 50

100.0%
ACCURACY

COMPLETION: **100.0%**

Interpret coded messages to uncover a targeted operation.

Tracking the Tracker (Hard)

75 POINTS
OUT OF 75

100.0%
ACCURACY

COMPLETION: **100.0%**

Cross reference Kismet GPS/WiFi/BLE logs with publicly available data.

Password Cracking Module

Identify types of password hashes and apply various techniques to efficiently determine plaintext passwords.

4TH PLACE
OUT OF 341
EXPERIENCED STUDENTS RANK

355 POINTS
OUT OF 355
PERFORMANCE SCORE

Average: 81.1%

Average: 77.7%

99th Experienced Students
Percentile

Average: 252.7 Points

ID Me (Easy)

40 POINTS
OUT OF 40

100.0%
ACCURACY

COMPLETION: **100.0%**

Identify MD5, SHA256, bcrypt, and JWT strings.

Bitcoin Hashes (Easy)

45 POINTS
OUT OF 45

100.0%
ACCURACY

COMPLETION: **100.0%**

Generate random strings and hash them until the output contains the requested characters.

Lightly Seasoned (Easy)

40 POINTS
OUT OF 40

100.0%
ACCURACY

COMPLETION: **100.0%**

Use a known plaintext attack to extract a user's password from a database of hashed passwords.

2-Ways (Medium)

50 POINTS
OUT OF 50

100.0%
ACCURACY

COMPLETION: **100.0%**

Crack wireless passwords from packet captures using aircrack-ng and hashcat.

l33t p45\$vv0rc1z (Medium)

100 POINTS
OUT OF 100

100.0%
ACCURACY

COMPLETION: **100.0%**

Perform a wordlist attack by generating possible candidates from known behaviors.

Unlocking 2 (Hard)

80 POINTS
OUT OF 80

100.0%
ACCURACY

COMPLETION: **100.0%**

Generate BitLocker recovery key wordlists, crack the key, and decrypt the drive.

Scanning & Reconnaissance Module

Identify and use the proper tools to gain intelligence about a target including its services and potential vulnerabilities.

12TH PLACE
